

Client Success : Tailored Logistics in Action

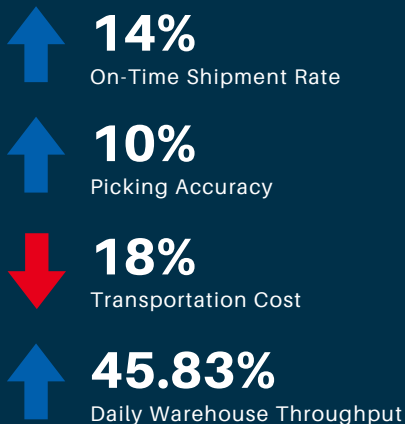

A Data-Driven Warehouse Transformation Powered by LOGISTEED America

Introduction

When a leading industrial supplier began facing warehouse inefficiencies and rising logistics costs, they turned to LOGISTEED America for a smarter solution. Our Contract Logistics experts stepped in with a customized approach that combined layout redesign, data visualization, and strategic planning to overhaul their operations from the ground up.

Key metrics

After implementation, the client saw measurable gains across the board

Visual dashboards now keep the client aligned with daily KPIs, while scalable systems support ongoing growth

"Partnering with LOGISTEED America turned our warehouse from a cost center into a strategic asset. Their team brought clarity, control, and real value to our operations."

CLIENT CHALLENGE

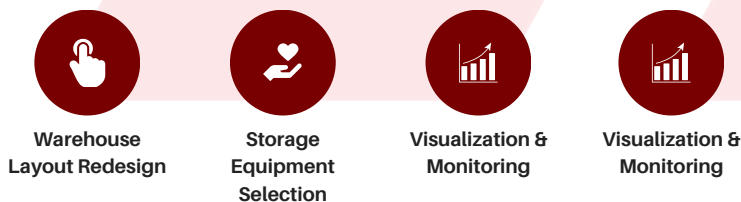

Before partnering with LOGISTEED, the client's warehouse suffered from:

- Poor inbound/outbound coordination
- Disorganized storage layout
- Lack of visibility into logistics costs
- Limited ability to track real-time performance
- Rising transportation expenses

Their goals were clear: reduce costs, improve efficiency, and build a logistics system that could scale with demand.

LOGISTEED'S TAILORED SOLUTION

Our team conducted an end-to-end analysis and delivered an integrated solution based on key Contract Logistics capabilities:

1

Warehouse Layout Redesign

We analyzed movement patterns, product types, and volume to design a flow-optimized warehouse layout, including new zones for staging, picking, and high-turn inventory.

2

Storage Equipment Selection

Our engineers evaluated existing infrastructure and introduced modular storage solutions tailored to the client's SKU variety and picking frequency.

3

Visualization & Monitoring

By implementing our Warehouse Monitor and logistics visualization tools, we provided real-time insights into:

- Work batch productivity
- Logistics cost breakdowns
- Operational bottlenecks
- KPI tracking across teams

4

Optimal Location & Transportation Modeling

We conducted a transportation cost plot analysis comparing 3 vs. 4 warehouse scenarios — ultimately reducing last-mile costs and improving coverage.

WHY LOGISTEED AMERICA?

With decades of experience in tailored logistics, we turn complexity into clarity — from warehouse floors to executive dashboards. Whether you're looking to redesign a layout or rethink your entire supply chain, our solutions are engineered to grow with you.
